

You Can't Clean Coal!

Come confront the faceless puppeteers of the coal lobby!

The Brumby Government likes to talk about taking the lead on climate change, but they are actively supporting the continuation of coal power as Victoria's major source of energy, and providing only very limited support for renewable energy opportunities.

Labor is continuing to:

- Invest in the construction of new coal-fired power stations in the La Trobe Valley
- Lobbying to get the owners of coal power stations more compensation from taxpayers money under the emissions trading scheme
- Accepting thousands of dollars in donations from coal corporations in return for private meetings in which coal expansion is discussed (as it is at this upcoming coal conference).
- And, continues to invest in so called 'clean coal' research rather than directly investing in renewable energy production, which could meet Victoria's baseload energy demands.

With dire predictions for our planet made daily, it is time for Victorians to stand up to the Victorian Labor bosses and the corporate coal lobby!!

Join us on Tuesday 30th, 8am at the Century Inn, Traralgon, to send this message load and clear to **Peter Batchelor.**

Dress up as a cleaner & bring noise makers!!!!!!

Contact: Kristy 0421 323 839 or Shaun 0402 337 077 for more info & to join the car pool !!
